

# RIGELS AHMATI

## Software Developer

Passionate software developer with over 2 years of hands-on experience in web application development. Skilled in .NET, JavaScript, SQL and many more, I enjoy building efficient and scalable solutions. Currently advancing my studies in ICT at Aleksandër Xhuvani University, I thrive in real-world projects that challenge my problem-solving skills

## Skills

Full Stack | OOP | C# | ASP.NET | ASP.NET Core | ASP.NET MVC | SQL | Entity Framework | SQL Server | LINQ | Git | Rest API | Debugging | Python | HTML | Js | JQuery | Css | Bootstrap | Team Working | Problem-Solving | Communication | Adaptability | Continuous Learning | Work under pressure

## Language

Albanian

English

Italian

## Education

### Aleksandër Xhuvani University

Bachelor in Information and Technology — 2025 - 2028

Currently pursuing a Bachelor's degree in Information Technology, focusing on software engineering, data structures, and modern web development practices. Gaining a strong academic foundation in system design, programming principles, and database management while applying knowledge in real-world projects.

### Shkolla Profesionale Elbasan

ICT Program — 2025 - 2028

Completed a specialized ICT program with a strong emphasis on programming, databases, and web development. Developed practical skills in software development, problem-solving, and system design through hands-on projects and technical training.

# Experience

## Founder & Product Developer

FleetLy – SaaS Platform for Car Rental Management - fleetly.al — Jul 2024 - Present

Founded and continue to develop FleetLy, a SaaS platform that helps car rental companies manage their entire operations efficiently. The platform is actively used by 3 businesses, managing 100+ vehicles.
Key features include:

- Reservation Management: Calendar-based bookings and dynamic availability handling
- Fleet Management: Track, organize, and optimize vehicles
- Guest Management & Discounts: Manage clients, apply promotions, and rating plans
- Payments & Invoices: Integrated PayPal and Stripe payments, automated invoice generation
- Insurance & Notifications: Manage insurance policies and send automated notifications to clients
- Booking Engine: Online booking for customers, supporting Google and Facebook login
- Vehicle Document Vault: Store documents with expiry reminders
- Vehicle Maintenance Management: Schedule and track maintenance tasks
- Vehicle Gallery: Upload and manage vehicle images
- And many more continuously evolving features based on real client feedback

Continuously enhancing the platform to improve usability, operational efficiency, and business growth. Deployed and maintained on a cloud Windows server, handling all hosting, updates, and platform reliability.

## Software Developer

Elite Travel Group — Jan 2024 - Nov 2025

I have been actively involved in developing and maintaining web applications that support daily business operations, contributing to improved system reliability and efficiency. My experience spans both backend and frontend development, where I design scalable systems, implement clean architectures, and deliver practical business solutions. On the backend, I build and optimize APIs using C#, .NET, Entity Framework, LINQ, and SQL Server, with a strong focus on performance and maintainability. On the frontend, I create responsive and user-friendly interfaces using HTML, CSS, Bootstrap, JavaScript, and jQuery, ensuring a smooth and intuitive user experience. I collaborate closely with cross-functional teams, applying strong problem-solving and communication skills to consistently deliver efficient, high-quality code under tight deadlines.

## Software Developer Internship

Elite Travel Group — Oct 2023 - Dec 2023

During my internship, I contributed to the development of internal systems using ASP.NET Core and Entity Framework. I collaborated closely with senior developers to design and implement new features, improve data handling processes, and enhance UI consistency using Bootstrap and JavaScript. This experience provided me with valuable hands-on exposure to full-stack development within a real-world business environment.

# Courses & Certificates

## Full Stack Programmer

Elite Academy, Associated with Elite Travel Group

Completed a comprehensive full-stack development program covering backend and frontend development, database management, and deployment. Gained hands-on experience building real-world web applications, focusing on C#, ASP.NET Core, SQL Server, HTML, CSS, Bootstrap, and JavaScript.

## Introduction to Cyber Security

Cisco

Completed a foundational cybersecurity course from Cisco, learning principles of network security, threat identification, risk management, and best practices for protecting digital systems and data. Developed an understanding of how to secure applications and user data against common cyber threats.

## Introduction to IoT

Cisco

Completed an introductory Internet of Things course from Cisco, acquiring knowledge of connected devices, sensors, data collection, and IoT architecture. Explored practical applications and the integration of IoT systems into real-world scenarios.

## JavaScript Essentials

Plurasight

Completed a core JavaScript course on Pluralsight, gaining skills in variables, functions, DOM manipulation, event handling, and basic asynchronous programming. Built practical exercises to create interactive web pages and dynamic front-end features.
